

THANAWAT PRASERT

Civil Engineer | Site Engineer | Structural & Construction Works

Bangkok, Thailand | +66 8X XXX XXXX | thanawat.prasert@example.com
Thai National | Available for site-based work and relocation within Thailand

PROFESSIONAL SUMMARY

Civil Engineer with over 7 years of experience in building construction, reinforced concrete works, structural coordination, quantity checking, subcontractor supervision, progress reporting, and site quality control. Experienced on commercial buildings, residential towers, warehouse structures, drainage works, and renovation projects. Comfortable working directly with consultants, foremen, subcontractors, suppliers, and project managers in fast-moving site environments.

CORE SKILLS

- | | |
|---|--------------------------|
| - Construction site supervision | - QA/QC documentation |
| - Reinforced concrete works | - Concrete pour planning |
| - Structural drawings & shop drawings | - AutoCAD |
| - Quantity take-off & BOQ checking | - Microsoft Excel |
| - Method statements & inspection requests | - MS Project - basic |
| - Daily/weekly progress reports | - Survey coordination |
| - Subcontractor coordination | - Safety coordination |

PROFESSIONAL EXPERIENCE

Senior Site Engineer Siam Urban Construction Co., Ltd. - Bangkok, Thailand	Mar 2022 - Present
---	---------------------------

- Supervise structural and architectural works for a 28-storey mixed-use residential project, including foundations, columns, beams, slabs, masonry, waterproofing, and finishing interfaces.
- Coordinate daily activities of 4 subcontractor teams and approximately 60-90 site workers depending on construction stage.
- Review IFC drawings, shop drawings, bar bending schedules, and site conditions before work proceeds; raise RFIs when drawings conflict with actual conditions.
- Prepare inspection requests for rebar, formwork, embedded items, concrete pours, waterproofing, and completed works for consultant approval.
- Check quantity and delivery of concrete, reinforcement steel, formwork materials, blocks, and finishing materials against planned usage.
- Track weekly progress against the master schedule and prepare concise site progress updates for the project manager.
- Coordinate concrete pours with batching plant, pump supplier, laboratory technician, and consultant inspector; monitor slump test, cube sampling, and pour sequence.
- Support resolution of site issues including level differences, opening mismatches, MEP clashes, delayed materials, and subcontractor manpower shortages.

Site Engineer

Jun 2019 - Feb 2022

Metro Build & Engineering Co., Ltd. - Samut Prakan, Thailand

- Supervised construction of warehouse and light-industrial buildings including pile caps, ground beams, reinforced concrete floors, steel structure interfaces, drainage, and external works.
- Checked line, level, dimensions, reinforcement spacing, cover, anchor bolt locations, and embedded items before inspections and concrete placement.
- Prepared daily site reports with manpower, equipment, work progress, material arrivals, weather conditions, and key site issues.
- Worked with survey team for gridline setting out, slab levels, column positions, and external drainage alignment.
- Verified subcontractor work quantities for progress claims and assisted quantity surveyor with measurement checks.
- Maintained records of concrete test results, material approvals, inspection requests, and non-conformance corrective actions.
- Coordinated corrective works when site installation did not match approved drawings or consultant comments.

Junior Civil Engineer

May 2017 - May 2019

Eastern Infrastructure Services - Chonburi, Thailand

- Assisted senior engineers with site supervision for road improvement, drainage, retaining wall, and small reinforced concrete structures.
- Measured completed work and prepared basic quantity calculations for earthwork, concrete, reinforcement, formwork, and drainage pipes.
- Checked contractor workmanship and reported defects or deviations to the supervising engineer.
- Prepared AutoCAD mark-ups and simple as-built drawings based on field measurements.
- Recorded site photos, inspection notes, daily progress, and material delivery information.

SELECTED PROJECT EXPERIENCE

Rama IX Mixed-Use Residence, Bangkok

28-storey reinforced concrete structure; approximately 42,000 sq.m. gross floor area. Responsible for structural floor cycle coordination, inspections, pour planning, and subcontractor follow-up.

Bang Na Logistics Warehouse, Samut Prakan

Large warehouse development with RC foundations, slab-on-ground, drainage, loading areas, and structural steel interfaces.

Chonburi Industrial Access & Drainage Works

Road rehabilitation, side drains, manholes, culverts, and retaining wall works supporting industrial estate access.

EDUCATION

Bachelor of Engineering (Civil Engineering)

2013 - 2017

Rajamangala University of Technology - Thailand

TRAINING & CERTIFICATIONS

- Construction Safety for Supervisors - internal certified training
- Working at Height Awareness
- Basic First Aid and Emergency Response
- AutoCAD for Construction Drawings
- Concrete Quality Control and Site Testing - company workshop

LANGUAGES & ADDITIONAL INFORMATION

- Thai: Native
- English: Working proficiency - comfortable reading drawings, specifications, RFIs, and technical emails
- Driving licence: Thai private car licence
- Work preference: Site engineering, construction supervision, structural coordination, QA/QC support
- Availability: 30 days' notice
