

ALEX MORGAN

Software Engineer | Backend & Data Systems

Bangkok, Thailand | alex.morgan@example.com | +66 81 555 0184 | github.com/alexmorgan-dev | linkedin.com/in/alexmorgan-dev

PROFESSIONAL SUMMARY

Software engineer with 4+ years of experience building backend services, data pipelines, and internal platforms. Strong in TypeScript, Python, Go, PostgreSQL, REST APIs, and cloud-native systems. Experienced with event-driven processing, web scraping, observability, and practical machine-learning integration.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL, Java

Backend: Node.js, Express, FastAPI, REST APIs, WebSockets, background workers

Data: PostgreSQL, SQLite, Redis, BigQuery, pandas, ETL/ELT pipelines

Cloud & DevOps: AWS, GCP, Docker, GitHub Actions, Linux, Nginx

AI/ML: scikit-learn, sentence-transformers, Ollama, embeddings, LLM structured extraction

Tools: Git, Playwright, Neovim, Postman, Grafana

PROFESSIONAL EXPERIENCE

Orbit Labs Co., Ltd.

Software Engineer

Jan 2024 - Present

Bangkok, Thailand

- Designed and maintained TypeScript and Go services handling approximately 1.5 million API requests per day.
- Built a PostgreSQL-backed job processing system with retry policies, idempotency, and structured application logs.
- Reduced median API latency by 38% by profiling database queries, adding targeted indexes, and introducing Redis caching.
- Developed Playwright-based data collectors that ran independently across multiple sources and persisted normalized results to SQLite.
- Integrated local LLM inference for structured text extraction using JSON schemas and deterministic post-processing.

Northstar Digital

Junior Backend Developer

Jun 2022 - Dec 2023

Yangon, Myanmar

- Implemented REST endpoints and background tasks in Python using FastAPI and PostgreSQL.
- Created ETL scripts for CSV and API datasets, including validation, deduplication, and daily reporting.
- Added Docker-based local development environments and CI checks that reduced environment-related onboarding issues.
- Wrote unit and integration tests for authentication, billing, and data-import workflows.

PROJECTS

LinkedOut - Local Job Discovery & Resume Matching Platform

- Built a TypeScript + Playwright pipeline for collecting job listings and details into SQLite.
- Implemented resume and job-description extraction using deterministic parsing, NER enrichment, local LLM inference, and explainable scoring.
- Designed the pipeline so embeddings and semantic retrieval can be added later without changing the source-of-truth data model.

Realtime Metrics Dashboard

- Created a Go backend and WebSocket stream for live application metrics with PostgreSQL persistence.
- Containerized services with Docker and deployed a small production environment on AWS.

EDUCATION

Asia Institute of Technology

M.Sc. Computer Science

2020 - 2022

Bangkok, Thailand

- Coursework: Distributed Systems, Machine Learning, Advanced Databases, Cloud Computing.

Riverland University

B.Sc. Computer Science

2016 - 2020

Yangon, Myanmar

CERTIFICATIONS & LANGUAGES

Certifications: AWS Certified Cloud Practitioner (2024); Google Cloud Digital Leader (2023)

Languages: English (Professional), Burmese (Native), Thai (Conversational)
